LET US **INFOTAIN** YOU.

P R E S E N T I N G

WITH XM'S INFOTAINMENT,  
THE CAR OF TOMORROW IS HERE TODAY.

The "connected car" of the future is a lot closer than you think. Thanks to the forward-thinking engineers at the XM Innovations Center, the best satellite radio entertainment on the planet now provides vital data services direct to your vehicle. And not just data in the abstract sense of the word, but in the live-as-it-happens, can't-live-without-it sense. And all delivered straight to your vehicle: Live, visual updates on traffic. Immediate reports on weather conditions. On-the-go info about available and nearby parking spaces. Real-time sports scores and stock quotes. Live and on-demand video news, sports and entertainment. Plus, sophisticated voice-control features as you drive. These advanced data services represent the next chapter in the XM success story...

DON'T JUST NAVIGATE TRAFFIC.  
CIRCUMNAVIGATE IT.

Now available in select new vehicles and aftermarket navigation systems, XM NavTraffic is the nation's first satellite-delivered traffic information service. It enables your vehicle's navigation system to display constantly refreshing and current traffic conditions for your desired route. For the first time, XM NavTraffic makes it possible for drivers in select markets to easily access critical and customized info such as traffic congestion, accidents, incidents, road construction, average speed and estimated driving time. All compiled using the very best, verified national and local traffic data available. And all delivered by XM's extensive network for user-friendly display on your NAV screen. It's simply the most accurate and reliable way to get the very latest information on conditions out there on the roads. Best of all, it transforms your NAV system from a device you use on occasion to something you'll rely on every time you get behind the wheel. Visit [www.xmnavtraffic.com](http://www.xmnavtraffic.com) to learn more.

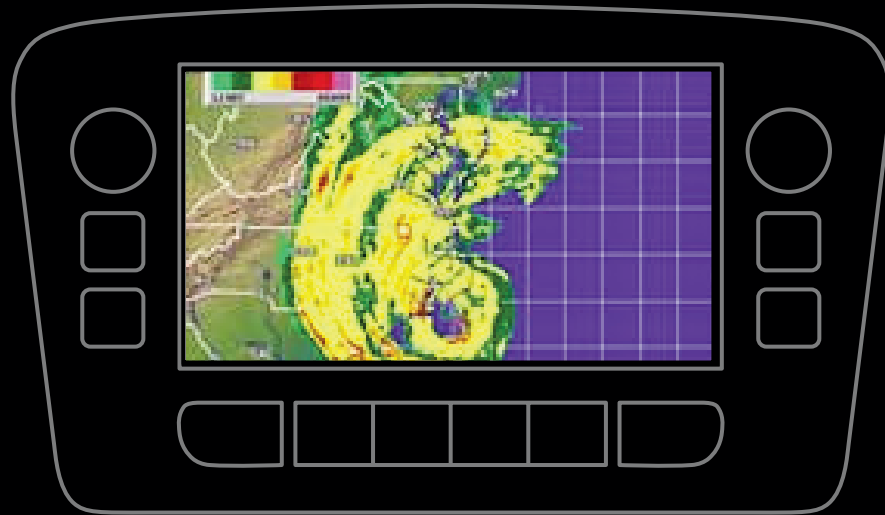

FLOODED ROAD AHEAD? GOLF-BALL SIZED HAIL?  
ICY BRIDGE? YOU KNEW THAT.

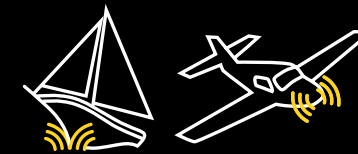

You're driving along an unfamiliar country road when you see a storm punishing the horizon. No big surprise. Because you already watched that very same storm forming on your NAV screen 30 minutes ago when your system prompted you to divert your route. Launching soon, XM Weather enables real-time graphical weather overlay on your GPS navigation system for maximum driver awareness of potential threats. Your navigation system interprets the data for you and simply informs you of current and future weather and road conditions (slippery, wet, icy, etc.) as well as atmospheric conditions (rain, sleet, snow, wind, fog, precipitation intensity, etc.). National Weather Service warnings and city weather forecasts are also provided.

WEATHER BY CAR OR BOAT OR PLANE.

XM Weather is derived from the exact technology as our professional-grade weather information service, XM WX<sup>®</sup> Satellite Weather. The XM WX service provides real-time, constantly updated weather-situation awareness for the aviation, marine and emergency-responder markets. XM WX offers the most comprehensive site-specific data available with more than 25 information services provided. Trusted by pilots everywhere – indeed, over 85% of new general aviation aircraft offering factory-installed avionics feature this service – XM WX is the best way to stay safely one step ahead of Mother Nature. For more info go to [www.xmwxweather.com](http://www.xmwxweather.com).

ROCK-STAR PARKING EVERYWHERE YOU GO.

Ever have an important meeting and have to drive around endlessly searching for a parking space? Ever been late for a flight and feel that the parking-space gods are not on your side? Never want to do it again? XM Parking is a satellite-based service that will send you live, dynamic and relevant parking-space availability in the area you're driving. Municipal and metro garages, airport parking and mass transportation parking – even shopping malls. Best of all, all up-to-the-minute parking info is displayed clearly on your NAV screen, with color-coding to indicate how many of the facility's spaces are available at that moment. XM Parking is an indispensable driving partner that keeps you informed of what you need to know now.

LOVE TO FOLLOW SPORTS  
WHY NOT MAKE SPORTS FOLLOW YOU?

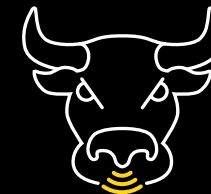

Avid sports fan who follows your favorite teams without missing a score? Diehard New York Mets fan who just so happens to live in Seattle now? With XM Sports' 24/7 stream of info, you can stay up on your favorite sports as the results roll in – whether you still live in your hometown team's town or not. With live updating data beamed direct to your vehicle, you're assured to get team stats and scores as they happen. Without interrupting your favorite listening on XM Radio's 170 channels. Your screen even continues to display the channel, track and artist info as you keep up with who's romping who. XM Sports is the sports fan's ultimate game buddy.

GET WALL STREET ON ANY STREET.

So you're a clued-in watcher of Wall Street who checks in on certain stocks like a hawk. Meet your new direct connection to never missing a market upswing or downturn again. With XM Stocks, you always have your personal portfolio of stocks and market results right in front of you on your NAV screen – live, as they move up or down throughout the day. What's more, all the while, your screen continues to display the channel, track and artist info as you listen to your XM Radio channels. So you can stay every bit as informed and up-to-date in your car as you can online.

ISN'T IT ABOUT TIME LIVE VIDEO  
CAME TO YOUR OTHER LIVING ROOM?

Picture this: On your vehicle's headrest video screen, XM Video delivers direct-to-your-vehicle live video feed including news broadcasts like business and sports updates. On another video screen in the backseat, our satellite-delivered content allows onboard memory to continually cache a variety of on-demand programming to your XM Video system – always ready for viewing whenever you (or your kids) are. Music videos. Concerts. Cartoons. What XM did for in-car audio, we now have the power to do for video. Live and on-demand entertainment so fun, so informative, so fresh and at the ready, your vehicle becomes your very own family entertainment center on wheels. And you never have to leave home without it – it goes where you go without anyone having to remember to pack it.

YOUR EVERY WISH, YOUR EVERY WHIM, IS OUR COMMAND.

Imagine saying aloud as you're driving, "I'd love to hear some jazz right now." Imagine your XM radio speaking back to you, asking which of the five different XM jazz channels you'd care to hear. You utter your preference and your radio switches over automatically – without your hands ever leaving the steering wheel. That's the beauty of XM VoiceCommand. Practically anything you do to control your XM Radio – or even your new XM Infotainment features – by pushing buttons, you'll be able to do with your voice. The best part is you don't have to learn another language to operate it – just converse naturally: "What's the weather like in Miami right now?" "How'd the Mets do last night?" "What Yes album is this song from?" "What is GE trading at this hour?" As many real-time questions as you can ask, XM VoiceCommand speaks the answers. And you'll never lift a finger.
