ACURA MODELS

AVAILABLE ON THE
2009 RL, TL AND TSX

REMEMBER WHEN UNEXPECTED TRAFFIC AND
INCLEMENT WEATHER USED TO SLOW YOU DOWN?

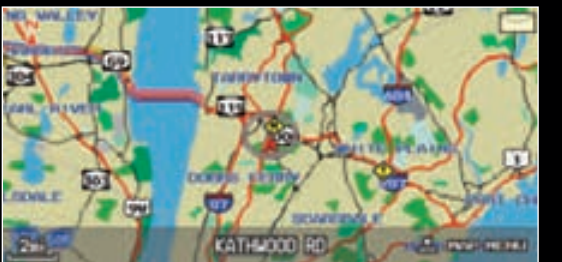

Hardware and required XM radio, XM NavTraffic and XM NavWeather monthly subscriptions sold separately after trial period. All programming, fees, and traffic data subject to change. XM NavTraffic only available in select markets. NavWeather data displays and individual product availability vary by hardware equipment. Subscriptions are subject to the Customer Agreement available at xmradio.com. XM service only available in the 48 contiguous United States. The XM name, XM NavTraffic and XM NavWeather are trademarks of XM Satellite Radio Inc. © 2008 XM Satellite Radio Inc. All rights reserved. 6/08

You're driving to an important presentation – where you're the keynote presenter – but a jackknifed tractor trailer a few miles ahead has all lanes closed. Moments after the accident though (and well before you begin to see brake lights) your navigation system alerts you of the incident and instantly diverts your route to safely avoid delays. Phew.

XM NavTraffic® is the nation's first satellite-delivered, real-time traffic information service and is standard equipment on vehicles that have the AcuraLink™ Communications System. It enables your Acura's NAV to show – as clear and colorful graphic overlays – constantly refreshing traffic conditions for your designated route ahead. XM NavTraffic lets Acura drivers in 77 markets easily access critical and customized info such as traffic congestion, accidents, incidents, road construction, average speed and estimated driving time. All compiled using the very best, verified national and local traffic data available. And all delivered by XM's extensive network. Visit xmradio.com/navtraffic.

**TRAFFIC CONGESTION 5 MILES AHEAD?
YOU KNEW THAT.**

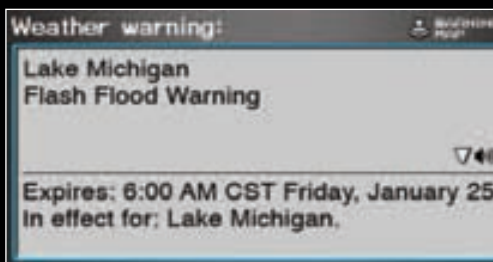

**TORNADO WARNING 10 MINUTES DOWN THE ROAD?
YEP, YOU KNEW THAT, TOO.**

Featuring Threat Matrix Technology

You're driving along an unfamiliar country road when you see a thunderstorm punishing the horizon up ahead. As threatening as it looks, it's not exactly news to you. Because you watched that very same storm forming on your NAV screen 20 minutes ago and were automatically prompted to take the safest alternate route. No worries.

Available now on the 2009 Acura RL, TL and TSX, XM NavWeather™ is the first real-time, personalized weather-tracking service for GPS navigation systems. Award-winning XM NavWeather utilizes the same real-time dynamic data from trusted sources as our XM WX® weather service: the one that pilots and marine professionals rely on when they're at the mercy of Mother Nature. XM's powerful Threat Matrix technology provides immediate alerts with easy-to-read, detailed graphical weather overlays on your AcuraLink™ Communications System, ensuring maximum awareness at all times. It not only informs you of current and forecasted weather and road conditions (slippery, wet, icy, etc.), but also atmospheric conditions (rain, sleet, snow, wind, fog, precipitation intensity, etc.) National Weather Service warnings, plus 1-day and 3-day city forecasts are also supplied. Visit xmradio.com/navweather.
